RE: CLI-CR10-0.41 Clarksville Road – Upcoming Construction Activities

The Clinton County Engineer's Office would like to provide an update on the upcoming construction activities associated with the **CLI-CR-10-0.41 Clarksville Rd project** between Cowan Creek Rd and the Village of Clarksville.

- **Clearing work is anticipated to begin after October 1, 2026.** During this initial phase, motorists should expect intermittent one-lane traffic through the work zone. Traffic will be controlled by flaggers, and drivers are encouraged to use caution and allow additional time when traveling through the area.
- Following the clearing work, **utility relocations are anticipated to take place over the winter months.** The timing of this work will be coordinated with the affected utility providers.
- **Full roadway construction is anticipated to begin in early spring 2027.** Additional information regarding the construction schedule, traffic impacts, and specific work activities will be provided as the project progresses.

The County Engineer's Office recognizes the importance of keeping residents, property owners, businesses, and other affected parties informed throughout the project. Anyone who would like to receive project updates by email is encouraged to contact:

Clinton County Engineer's Office (cceo@clintoncountyengineer.org) Please include your name and contact information and indicate that you would like to be added to the **Clarksville Rd** email notification list.

We appreciate your patience and cooperation as this project moves forward.

Respectfully,

Adam Fricke, P.E., P.S.
Deputy Engineer
